

BASIC T-Shirt DRESS

1. Lay T-shirt flat on table and measure bottom of shirt (A). Then measure the length of the shirt (B).

2. Multiply shirt width (A) by 4. This will be the width of the skirt fabric. Divide shirt length (B) by 2. This will be the length of the skirt. Cut a piece of fabric to these dimensions.

3. Fold fabric in half, right sides together, and sew the two short edges together. Then either serge or zigzag along seam edge. You'll end up with a large circle of fabric.

4. Run a gathering stitch along the top edge of the fabric circle about 1/2" from edge. Gather fabric until it equals the width of the T-shirt (A) + 2".

5. Turn skirt inside out and place T-shirt inside skirt. Pin gathered skirt edge to bottom edge of T-shirt, right sides together (hem edge of skirt facing up, gathered edge facing down). Sew gathered edge of skirt to bottom edge of T-shirt, stitching twice all around, and slightly stretching T-shirt to match gathered skirt edge (A + 2"). Serge or zigzag seam edge.

6. Flip gathered skirt down and lightly press the seam. Fold over the bottom edge 1/4-inch twice and stitch hem.
